MaryBeth Decker

Hey Lauren I'm introducing you to my friend and collaborator Zosia. She just sent me the pic of the Mnemiopsis that her husband Hannes collected with a beach seine in Mumford Cove. Thanks for your help Zosia!!

My pleasure Mary Beth! Hello Lauren, please let me know how I can be of help!

Wed, Apr 28, 4:10 PM

Hi Zosia! Thanks Mary Beth for the introduction! So great to hear you have found jellies over in Groton! Right now it would help to know where/when you saw the jellies you did! I am on the lookout for those specific species and its super great to create of network of people that let me know what they see and where!

Hi Lauren, this is the screenshot for the rough location.  
They caught it during high tide today, around 11am

FYI, in 2 weeks is the next time there will be beach seining  
at that beach

MaryBeth Decker

Thanks Zosia!!
